

SHORT BIOGRAPHY

Stephen R. Jordan

Founder & Principal Advisor, SRJ Consulting & Services LLC

Author, The Operating Discipline for AI Library™

Stephen R. Jordan is the founder of SRJ Consulting & Services LLC, an operator-led AI advisory practice in Frisco, Texas. He brings three decades of senior security, operations, and risk leadership, including roles at Citi, Intel, McAfee, and Optiv to the question executives now face: is AI making the business stronger, or quietly exposing it? Jordan built the practice on a deliberate constraint, no software sales, no vendor partnerships, no implementation fees, so the advice answers only to the client's outcomes. He is the author of seven volumes in The Operating Discipline for AI Library™, available now in hardcover, paperback, and Kindle, setting out The AI Operating System™ for running AI as a managed business function.
